Subject:

Dear Mr. Doe,

I read about the advertisement at Jobstreet.id, which your company is looking for someone to hold UI/UX Designer position. Based on the advertisement, I want applying application for this position.

This position appeals me in particular because I love design and have enthusiasm in every new trend of design. My hobbies is eating and listening to music without looking the genre is, so I think heavy metal after kpop is good though. What's more the work is similar to some of my previous projects, as Front End Developer.

I could literally happy to further elaborate on this letter, if you think I could be of value for EV Hive. I can be contacted at the address and phone on my resume.

I look forward to your call.
